# SYSTEM PLATFORM POWERED BY WONDERWARE

A Complete Industrial Automation Solution.

System Platform is an integrated, unifying supervisory SCADA platform that is integral to business processes and systems. It serves as the single source of actionable information for operational, engineering and corporate business users.

### Enforce Standards to Achieve Operational Excellence

System Platform supports simplified and standardised operations across a wide range of industrial operations and manufacturing facilities by eliminating inconsistent operational practices through a single information model, asset templates and data-driven responsive UI visualisation. This results in lower opex costs and drives improved quality.

### Flexibility to Ensure Operational Agility

With drag-and-drop simplicity, you can effectively respond to demands for increased performance, capacity expansion and retrofits without being constrained by prior application deployment decisions.

System Platform enables unique operational agility by completely separating the application design environment from the execution infrastructure environment. Customers can build and test in one environment and then move the entire application to a multi-node production environment without having to modify the application at all. The application design environment can even exist in the cloud enabling remote user collaboration.

### Grow at The Speed of Your Business

System platform provides you with the means to incrementally add-on additional capability when required by business needs. System Platform offers plug-in extension applications such as MES, workflow, quality, batch and enterprise Integration for sustainable production and continuous operations improvement.

More importantly, due to the open, modular platform approach seamless integration of Supervisory & MES applications is possible without abandoning prior investments in automation and information systems, production processes, or intellectual property.

### Excellence is a Purpose We Share with Our Customers

AVEVA is committed to being your long-term automation partner, backed by a world-class global network of technical support personnel, distributors, system integrators and VAR/OEMs, ready to assist you in every corner of the world.
